Earth Friendly Degradable Bags Now Available:

Introducing the bag that is totally earth friendly and recycles itself! EcoGreenOffice now offers 100% degradable retail bags of all sizes and colors. Unlike regular plastic bags which are harmful and take up landfill space, degradable retail bags can be reused, recycled and most importantly, they will disappear if they end up in a landfill.

While cornstarch bags weaken over time and can even shatter, EF/Bags maintain strength overtime, perfect for reuse. The EF/Bags are designed to break down after 18 months regardless of disposal method.

Green thinking retailers and consumers can use the bags for a variety of applications and they even meet FDA requirements for direct food contact.
